European PM2.5 Air Pollution — Data Overview (2024)

PM2.5 annual mean concentration across Europe (1 km interpolated grid, 2024)

Dataset summary:
Geographic coverage: Europe **Observed values (from dataset range):**
Low: ~5–8 µg/m³ (Northern Europe)
Medium: ~10–15 µg/m³ (Western Europe)
High: ~20–30+ µg/m³ (Eastern / industrial regions)

Year: 2024
Resolution: 1 km² grid
Indicator: PM2.5 (fine particulate matter)
Type: interpolated (sensor + model fusion)

DATA SOURCE
European Environment Agency
Dataset: PM2.5 European Air Quality (2024, interpolated interim data)
Published: June 2025
Format: GeoTIFF (.tif)
Purpose: EU exposure estimation & air quality monitoring
